Professional Summary

Full-stack engineer who shipped a production ordering platform used by 80+ hospital staff, then rebuilt it as OrderKit — a self-hosted ordering and scheduled-delivery platform with Stripe payments and live driver tracking, built on SQLite, Drizzle ORM, and better-auth. Peer-nominated for the 2025 Values in Action Award after 4+ years of solo night-shift operations.

Technical Skills

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS

Frontend: React (React.js), Next.js, Astro, Tailwind CSS, DaisyUI, Server-Side Rendering (SSR), Responsive Design, Accessibility

Backend: Node.js, Bun, PostgreSQL, SQLite, Drizzle ORM, Supabase, better-auth, Stripe, RESTful APIs, Server-Sent Events (SSE), Edge Functions, Docker, Linux (Ubuntu), Caddy, PM2

Tools & Practices: Git, GitHub, CI/CD (GitHub Actions), Vitest, AI-augmented development (Claude), State Management, Database Design, Performance Optimization

Projects

OrderKit — Self-Hosted Ordering & Delivery Platform

Stack: Next.js 16, React, TypeScript, Tailwind CSS, SQLite, Drizzle ORM, better-auth, Stripe, Bun

- Rebuilt CafeNightClub into a self-hosted ordering and scheduled-delivery platform, replacing the Supabase/Vercel cloud stack with SQLite, Drizzle ORM, and better-auth
- Designed a scheduled "drops" model — customers order against batched delivery runs with per-drop capacity and per-night order caps enforced transactionally
- Built live driver location tracking with GPS pings streamed to customers in real time over Server-Sent Events
- Integrated Stripe payments with a full authorize / capture / refund lifecycle, webhook idempotency, and a payment audit log

CafeNightClub — Night-Shift Operations Platform (predecessor, 80+ users)

Stack: Next.js, React, TypeScript, Tailwind CSS, Supabase, Vercel, Git

- Built and shipped a production ordering system for 80+ night-shift hospital staff with real-time tracking via Supabase Realtime WebSockets
- Role-based access control with Row-Level Security in PostgreSQL, push notifications, and automated operating hours
- Mobile-first PWA with server-side rendering, installed from phones with no app store needed

Work Experience

Food Service Partner

Jul 2021 – Mar 2026

Scripps Health - Mercy Hospital, Hillcrest

- **2025 Values in Action Award recipient**, peer-nominated across departments for service to patients and staff during night-shift operations
- Independently managed all night-shift cafeteria operations: inventory, station setup/breakdown, food preparation, and service for 50+ staff across Emergency, Respiratory, EVS, and other departments
- Identified ordering bottlenecks during solo operations and built a full-stack ordering platform, deployed into production use by hospital staff
- 18 peer recognitions over 4+ years from 15+ colleagues across departments for service quality, reliability, and positive effect on night-shift morale

Education

San Diego State University

May 2020

Bachelor of Science in Computer Science

Grossmont College

2017

Associate of Science in Mathematics / Computer Science
