

Nathan Huse

La Mesa, CA 91941 | husenathan@gmail.com | linkedin.com/in/sd-nhuse | n8than.dev

Professional Summary

CS graduate from San Diego State who taught himself modern web development by solving a real problem at work. Built an ordering platform for 80+ hospital staff, shipped it to production, then rebuilt it as OrderKit, a self-hosted product any venue can deploy with Docker. Looking for a team where I can keep shipping and learn from experienced engineers.

Technical Skills

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS

Frontend: React (React.js), Next.js, Astro, Tailwind CSS, DaisyUI, Server-Side Rendering (SSR), Responsive Design, Accessibility

Backend: Node.js, Bun, PostgreSQL, SQLite, Drizzle ORM, Supabase, better-auth, RESTful APIs, Server-Sent Events (SSE), Docker, Linux (Ubuntu), Caddy, PM2

Tools & Practices: Git, GitHub, CI/CD (GitHub Actions), Vitest, AI-augmented development (Claude), State Management, Database Design

Projects

OrderKit — Self-Hosted Ordering Platform

Stack: Next.js 16, React, TypeScript, Tailwind CSS, SQLite, Drizzle ORM, Bun, Docker

- Extracted and rebuilt CafeNightClub into a standalone ordering platform for any small venue, replacing cloud dependencies with SQLite and Drizzle ORM
- Real-time order updates via Server-Sent Events, role-based access (user, admin, owner), and email auth with approval workflow
- Docker container with Caddy reverse proxy for single-command VPS deployment
- Configurable venue settings: operating hours, pickup time slots, menu management, and capacity limits

CafeNightClub — Night-Shift Operations Platform (predecessor, 80+ users)

Stack: Next.js, React, TypeScript, Tailwind CSS, Supabase, Vercel, Git

- Built and shipped a production ordering system for 80+ night-shift hospital staff with real-time tracking via Supabase Realtime WebSockets
- Role-based access control with Row-Level Security in PostgreSQL, push notifications, and automated operating hours
- Mobile-first PWA, installed from phones with no app store needed

Work Experience

Food Service Partner

Jul 2021 – Mar 2026

Scripps Health - Mercy Hospital, Hillcrest

- **2025 Values in Action Award recipient**, peer-nominated across departments for service to patients and staff during night-shift operations
- Independently managed all night-shift cafeteria operations: inventory, station setup/breakdown, food preparation, and service for 50+ staff across Emergency, Respiratory, EVS, and other departments
- Identified ordering bottlenecks and built a full-stack ordering platform, deployed into production by hospital staff
- 18 peer recognitions over 4+ years from 15+ colleagues across departments for service quality, reliability, and positive effect on night-shift morale

Education

San Diego State University

May 2020

Bachelor of Science in Computer Science

Grossmont College

2017

Associate of Science in Mathematics / Computer Science
